BULLET-RESISTANT PACKAGE.

LAYER OF ARMOR FROM AN ATTACK WITH FIREARMS

Active shooters are meticulous planners with an "MO" for going inside buildings to seek out targets. High security doors keep unauthorized entry at bay. But, what if that shooter decides to unload on the front entrance in an attempt to gain entry? A bullet-resistant package can safeguard the integrity of your door up to a certain point and possibly save lives.

OVERVIEW

Our Bullet-Resistant Package equips a security door with the ability to stop three .44 magnum bullets, or a bullet twice as heavy and significantly faster than the bullet of the most common handgun, a 9mm semi-automatic. Using Level 3 bullet-resistant glass and reinforced framing, security doors are part of an effective active shooter defense plan.

BULLET-RESISTANT GLASS LEVEL 3

Security doors have curved glass and moving door wings with glass inserts. Because of this, security doors can accommodate Level 3 bullet-resistant glass. All bullet-resistant glass in the United States must conform to the standards outlined by Underwriters Laboratory, or "UL." Through testing, Level 3 bullet-resistant glass must be able to stop:

- ✓ Three shots within a 4" triangle with no spalling on the non-secure side (or glass chips that could fly and injure)
- ✓ Three shots within a 1.25 to 1.75 inch area with some spalling acceptable
- ✓ One unsupported edge shot with some spalling acceptable

DON'T FORGET THE FAÇADE

If the security door is on the building façade, it is recommended that the adjacent storefront be upgraded to include bullet-resistant materials as well. Because façades have flat glass, they can accommodate a much higher level of bullet-resistant glass than a security door, which has curved glass or moving glass in the door wings.

KEY BENEFITS

- ✓ Peace of mind in the event of an attack with firearms

SHOW ME, DON'T TELL ME

We call out each section of the door that is reinforced.

1. Door wing and curved sidewall glass: clear, poly-glass laminate, bullet-resistant, Level 3 glass (29mm thick)
2. Reinforced end and side posts: 1/8" steel-plate lining
3. Reinforced canopy façade on the non-secure side and canopy roof: aluminum lined with 7/16" bullet-resistant fiberglass

COMPATIBLE PRODUCTS

- ✓ Tourlock 180
- ✓ Circlelock Solo
- ✓ Circlelock Combi

LEVEL UP OR UPGRADE – WE OFFER FLEXIBLE SOLUTIONS

Buildings are designed to last a lifetime; so are our entry solutions. However, entry requirements change as the way we work and live changes, as rules and regulations are updated and as technologies evolve. Our accessory products are the perfect way to upgrade or update your existing Boon Edam entrance solution. More information on retrofits and upgrades can be found by asking your entry expert consultant.

OUR REACH IS **GLOBAL.**

We have been in business for more than 140 years manufacturing premium aesthetic and security entrance solutions in the Netherlands, United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors, but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint as well as a personal grasp of local markets and their unique entry requirements.
